## QUESTIONS AND ANSWERS

1. QUESTION: Are the REILs voltage driven with current sensing or are they 6.6A? Is this a 3-step LED REIL?

ANSWER: The REILs are voltage driven, 1-step. Using the AC terminology: Type 'L-849V' - REIL powered by airport voltage source, 'Style C' – Unidirectional, low intensity, one brightness step.
2. QUESTION: May the removed concrete pavement be utilized in the embankments on-site?

ANSWER: The existing concrete pavement that is removed can be utilized in the P-152 embankments if processed and placed according to the P-152 specification.
3. QUESTION: Is there area on-site available for additional borrow material should it be needed to construct the embankments on-site?

ANSWER: If additional embankment material is needed on-site, areas on-site are available for additional borrow material. It is not anticipated that off-site borrow material will be needed to complete proposed grading.
4. QUESTION: Are we to replace all of the panels on Side "A" and Side "B" or only replace the panels that have changed?

ANSWER: The Contractor is only to replace all the sign panels that change per sign under the "modify sign panels" pay item.
5. QUESTION: The plans indicate removing an existing 15kW regulator and installing a new 7.5kW regulator. Where are the pay items for the CCR?

ANSWER: All work in the vault, including the CCR's, are to be included in the "Vault Modifications" lump sum pay item.
6. QUESTION: Should the isolation transformers in the retrofitted signs be replaced?

ANSWER: Yes, per manufacturer's recommendations to account for the LED conversion.

## CONTRACTOR'S CERTIFICATION OF NONSEGREGATED FACILITIES

The federally assisted construction contractor certifies that it does not maintain or provide, for its employees, any segregated facilities at any of its establishments and that it does not permit employees to perform services at any location, under its control, where segregated facilities are maintained. The federally assisted construction contractor certifies that it will not maintain or provide, for its employees, segregated facilities at any of its establishments and that it will not permit its employees to perform services at any location, under its control, where segregated facilities are maintained. The federally assisted construction contractor agrees that a breach of this certification is a violation of the equal opportunity clause in this contract. The federally assisted construction contractor agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000 which are not exempt from the provisions of the equal opportunity clause and that it will retain such certifications in its files.
