## **Addendum # 2**

### **Bid: Electronics Recycling, November 2015 to January 2016**

Wicomico County Solid Waste would like to provide the following answers to inquiries that have been asked:

- Total tonnage per year of electronics of past 5 years:
  - 2011: 17.14 tons
  - 2012: No data exists
  - 2013: 11.32 tons
  - 2014: 85.48 tons
  - 2015 (YTD): 134.72
- It is estimated that 90% of the intake are televisions, monitors, and other electronics, while 10% are computers and laptops.
- The results from the most recent bid for electronics recycling are on page 2.
- Recyclers or haulers are not allowed to take material out of the downstream.
- Wicomico County Solid Waste will palletize and shrink-wrap all loads.
- There is no estimation of recyclables which will be disposed of during the life of this contract, however, there is currently one tractor-trailer load ready for pick up.
- Only one location will need to be serviced, the Wicomico County Solid Waste division address located on the original bid documents (6948 Brick Kiln Road, Salisbury MD 21801)
- A loading dock is available and Wicomico County Solid Waste will load recyclables at no charge for the winning vendor.
- There are no current issues with the latest winner of this bid (SAMR, Inc.) The only reason this service is being solicited formally is due to the fact that the contract with the latest vendor ended on September 30, 2015.
