## **Addendum # 1**

### **Bid: Bird Control Services**

A pre-bid walkthrough was held on January 19, 2016 at the project site. Attached to this document is the list of vendors who attended this meeting. In a separate attachment posted to the Wicomico County website, pictures of the project site can be seen.

The following are answers to questions Wicomico County has received regarding the above mentioned bid, both by direct contact and asked at the meeting:

- Wicomico County has not had any avian pest control of any kind last year, nor bird control services.
- Wicomico County has no bird contract at all, nor a current bird control provider. This bid will now start Arthur W. Perdue stadium on a bird preventative maintenance program.
- No blueprints/schematics are available for the stadium.
- The stadium is approximately 20 years old and being renovated
- The stadium is dealing with mostly small birds, such as pigeons and sparrows. There have been no known issues with bigger birds, such as seagulls.
- The specifications and plan of action were compiled as a “multi-pronged” approach, discussed and thought out over years. This service has been long awaited.

## Addendum No. 1

- A majority of vendors suggested that it would be more cost beneficial in the long run to do a one-time setup of netting rather than the gel, UV reflective paint, and haze generators. Thus, we request an alternate bid of using netting only, replacing the haze, paint, and gel locations as discussed at the pre-bid meeting.
  - o The netting used in these areas should be white in color in order to blend in with the concourse area.
  - o A new bid form is attached to this addendum, please use this bid form rather than the bid form in the initial bid documents.
