REVERSE 911 CELL PHONE REGISTRATION FORM

The Reverse 911 System is a citizen notification method that will automatically notify the Citizens of Wicomico County of important information in the event of an impending or occurring emergency via telephone communications.

The system utilizes telephone company phone listings and addresses to place calls to residences in specific areas or countywide. Telephone companies do not maintain data bases for cellular phones that include addresses. Therefore, cell phones must be added with an address in order for a cellular customer to receive the informational call.

If you wish to receive these emergency messages on a cellular phone you must register your cell phone with the Department of Emergency Services. Emergency Services will register (1) Cell phone per residence to ensure that you and your family receive these important calls. Please be assured that no information will be shared with anyone other than the Local Government Agencies utilizing the Reverse 911 System.

In order to assure of expeditious notification to the maximum number of residences, the registration is limited to (1) one cell phone per residence due to the time involved to call multiple phones for the same residence.

The reverse 911 system will not work properly if there is any type of ring back tone or music subscribed to your cell phone, other than the traditional ring tone.

- Check here if you currently have more than one Residential Landline Phone and enter the number you wish to receive the emergency messages _____
