REVERSE 911 “Communication Devices for the Deaf” (TTY or TDD) Registration Form

The Reverse 911 System is a citizen notification method that will automatically notify the Citizens of Wicomico County of important information in the event of an impending or occurring emergency via telephone communications.

The system utilizes telephone company phone listings and addresses to place calls to residences in specific areas or countywide. Telephone companies do not maintain data bases for TTY phones. Therefore, TTY phone lines must be added with an address in order for a TTY customer to receive the informational call in appropriate format. Due to the different technologies used in these devices, certain manufactured devices may or may not be compatible with this system.

In order to assure that a TTY user receives a TTY formatted Reverse 911 Emergency Message, the phone number must be registered with the Wicomico County Emergency Services. Please be assured that no information will be shared with anyone other than the local agencies utilizing the Reverse 911 system.

Please Print or Type

Name _____ Address _____

City _____ State _____ Zip _____

TTY/TDD Number _____

Mail to the above address or fax to 410-860-0901
