**We made history with clay courts**

# Now we're introducing the future of hardcourts

In 1931, a contractor named Henry Alexander Robinson (HAR) developed a court surface using American stone with a true green color. The surface quickly caught on with players everywhere — and the Har-Tru company was born.

Since then, Har-Tru has grown into the world's premiere manufacturer of court surfaces, equipment, accessories, and supplies. We are champions of the sport of tennis and our mission is to lead the tennis industry by creating better places to play. The addition of Har-Tru Sports Coatings expands our commitment to the game of tennis and to the people who make it possible.

## **Reliability**

Years of experience and refinement have made Har-Tru one of the most trusted names in the sports industry. Contractors, clubs, home owners, maintenance personnel, and players all rely on the assurance of quality that we deliver.

## **Premium Quality**

Our products are manufactured with the strictest quality and safety controls. Working with top industry chemists and installation experts, we've engineered an acrylic coating that creates a consistent, durable, high-performance surface.

## **One-stop Shopping**

Our goal is to make the construction process as seamless as possible. With a wide array of products manufactured to exacting specifications, you'll find nearly everything you need to build an exceptional court — all under one roof. Contractors also reap the added benefit of noticeable savings from combined shipping costs.

## **High Yield Efficiency**

Achieving superior yield is essential for constructing a cost-efficient court. Har-Tru Sports Coatings deliver performance and value through a formula that maximizes yield without sacrificing stability. The result is a sports coating engineered to spread consistently for the best possible surface coverage.

# Building on a 90-year History of Making Premium Products

---

## Flexible and Vibrant

All-weather, comfortable, and elegant, Har-Tru Sports Coatings feature UV resistant pigments in a range of vibrant colors. Layered over asphalt or concrete, our acrylic coatings are designed to deliver the right amount of flex for a surface that's consistent and stable.
